

Version 1.1, 10 December 2020

IANSEO ScoreKeeper App & Pictures upload

IANSEO ScoreKeeper can be downloaded from Google Play (Android) or AppStore (iPhone).

- Android: <https://play.google.com/store/apps/details?id=net.ianseo.scorekeeperlite>
- iPhone: <https://itunes.apple.com/app/ianseo-scorekeeper-lite/id912947613>

Here are the QR codes that will help you find the app. Scan the code for the desired platform and then install the app.

Android	iOS
	

Here is an example of the scorecard that archers will receive before the competition:

1  December I Indoor Archery World Series Online
Worldwide Online (WA), From 18-12-2020 to 20-12-2020 

Archer: **Santa Claus** 4 **100A**

3 Country: **NHP - North Pole** B M

18m-1	1	2	3	Sum	Tot.	10	9
1							
2							
3							
4							
5							
6							
7							
8							
9							
10							

 Total

SC0001-B-M-1

Scorer 1 _____

Scorer 2 _____

 December I Indoor Archery World Series Online

7							
8							
9							
10							

 Total

SC0001-B-M-2

Scorer 1 _____

Scorer 2 _____

8

Some important things to check in the scorecards:

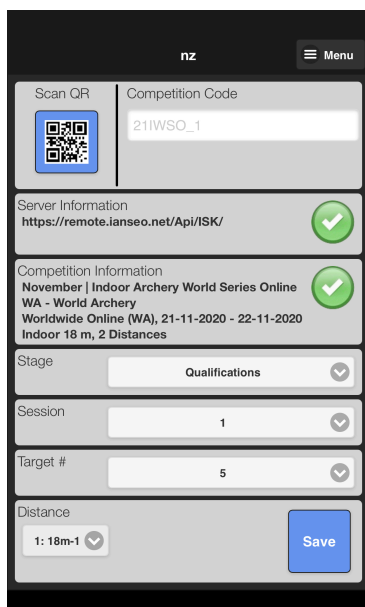

- 1- **Name and dates of the online competition**
- 2- **Name and Family Name of the archer**
- 3- **Country - Club of the archer**
- 4- **Target assignment: this is a progressive number from 1 to 999; it is NOT the number of real targets where archers will shoot, but only the virtual one**
- 5- **Category of the archer**
- 6- **1st or 2nd scoring part (in the picture second half)**
- 7- **QR Code of the 1st or 2nd scoring part (in the picture the first half)**
- 8- **Space for the double signature, if needed, when shooting at home/own place/range**

If any of the above information is wrong, please contact the IWS Support Team (support@archery.sport), in order to have everything fixed before the scoring starts.

Start the Scorekeeper app on a device and the screen below should be displayed. If you have already setup a previous tournament you scored through the ISK App, click on *Menu* (top right), then press *Setup* and allow the App to go back to the Setup screen.

Click the *Scan QR* button and scan the QR code on the scorecard; please pay attention to the distance (1st or 2nd part).

If all the information in the QR code is correct, a screen similar to this one will be shown.

You can just make a quick check of the information displayed, but they are reflecting the ones on scorecards.

You will only need to press the *Save* button to continue and, after that, press the *Yes* button to confirm the values.

Clicking on the *Menu* button in the upper right corner of the screen will display a menu of items, including *Pro* and *Manual Entry*, changing languages, and updating of languages; if you want to change language, first select the one you need from the menu and, after that, change the language. Only supported languages will be available.

From now on, you are ready to score!

The scoring entry screen is the main screen of the app and it will be the one archers will use the most. After setup, a screen similar to the ones below will be displayed. The appearance may differ slightly depending on the kind of mobile device in use.

Information regarding the current end, target number, archer information, and target type is clearly displayed. The arrow values are entered using the larger colored buttons. The current arrow is highlighted in red.

The command buttons at the bottom of the screen have functions to show the scorecard view, clear all arrow values, or progress to the next archer (for this specific use, next archer means going to summary and closing the current end).

If a single value needs to be changed, that value can be selected by clicking on it. After scoring the archer, a summary of the end is shown. In the summary screen, it is possible to change an archer score for the current end by clicking on the archer name.

The first two screenshots show the 'Scoring Entry' screen. The top bar displays 'Scoring Entry' and a 'Menu' button. Below this, the 'End' number is 1, and the 'Distance' is 18m-1. The 'Face' is Indoor (1-big 10). The archer's name is Hood Robin, WA, World Archery, BM-Barebow, Men. The target number is 5A. The 'Scored Points' section shows a target icon and a score of 0. The main area is a 3x3 grid of colored buttons (10, 9, 8, 7, 6, 5, 4, 3, 2) and a '1' button. The bottom bar has 'Scorecard', 'Clear All', and 'Next Archer' buttons.

The third screenshot shows the 'End Summary' screen. The top bar displays 'End Summary'. Below this, the 'Tgt' is 5A, the 'Athlete' is Hood Robin, WA, World Archery. The 'End Total' is 19, the 'Dist Total' is 19, and the 'Comp Total' is 19. The bottom bar has 'Edit Scores' and 'Continue' buttons.

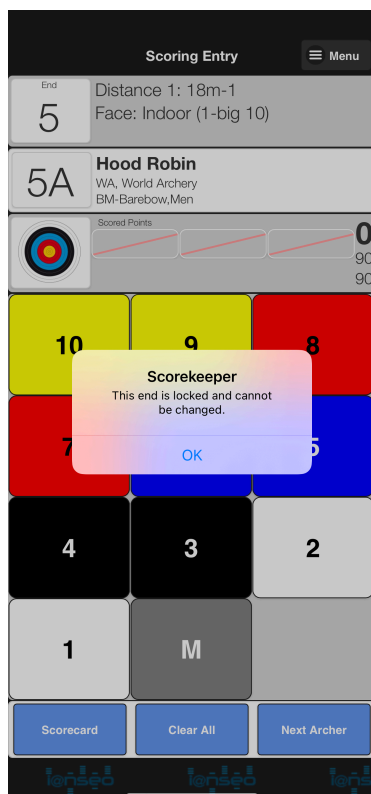

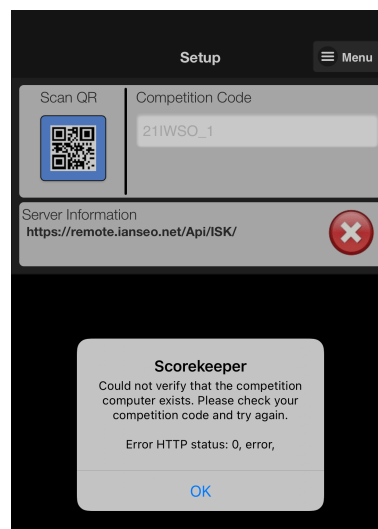

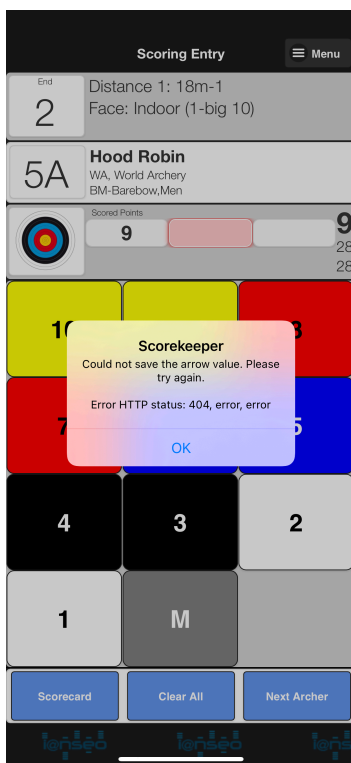

At this point, you can change scorecard (*Edit Scores*) or go ahead with the next end (*Continue*).

Clicking on the Menu button in the upper right corner of the screen will display a menu of items, including an electronic scorecard, User Preferences (Swipe Calibration), changing language, help screen, app information and the chance of returning to the setup screen.

Even though multiple archers are shooting on the same venue/target, each one must score with his/her own app.

During the setup or the scoring process, if there is any problem with data connection (public Wi-Fi or personal data), a screen similar to this one below will appear. You can go ahead shooting and scoring and, as soon as the problem of connection is solved, you can use the App and insert all the arrow values already scored.

A screen like the ones on the left means that the session/distance is locked, and the archer cannot score.

This situation happens if the shooting time allowed for each session has not started yet or it has already finished.

When scoring time is open, just click on the “End” button to refresh the connection to the server and you will have the session ready for scoring.

Important: do not forget to use the App, otherwise, after the time frame related to your session, it will be impossible to score, and all the remaining arrow values will be set to 0 (Miss).

After scoring the first 30 arrows, go on “Menu” then “Setup” to scan the QR code on the right of your paper scorecard to enable the app for the second distance.

First 30 arrows	Second 30 arrows
<div><div>Archer</div><div></div><div>Scan this code in the App to score 18m-1</div></div> <div><div>Scorer 1</div><div>Scorer 2</div></div>	<div><div>Archer</div><div></div><div>Scan this code in the App to score 18m-2</div></div> <div><div>Scorer 1</div><div>Scorer 2</div></div>

After the scoring process, if you are NOT shooting at an official WA registered competition, remember to upload pictures of the scorecards and target faces used, always in the same time frame you have selected for the shooting session.

December | Indoor Archery World Series Online

Worldwide Online (WA)
2020-12-18 / 2020-12-20

Registration Opening Date: **2020-11-16**
Final Entries Deadline: **2020-12-13**
Default timezone, when not otherwise specified, is World Archery Office timezone (CET/CEST when applicable)
