In the Olympic Round, Elimination and Finals Rounds, the value of the arrows will be determined by the Spotter and the Scorer in the order they are shot. These unofficial recorded values will be checked and changed if required by the athlete's agent when the official scoring takes place at the target. The agent of the opposing athlete/team will check the value of close arrows on the opponents target. In case of disagreement the assigned target judge makes the final decision. To verify the score the target judge calls the arrow scores in descending order. The Scorer and the athlete's agent check the correctness of the scores on the scorecards.
