Effective as of 1 April 2009

Book 3, Article 8.2.2.1.1

8.2.2.1.1

The set-up for a single face or a pair of faces: The centre of the single face or the centre of the middle face of the vertical triple face will be 130cm above the floor. The tolerance measurement must not exceed +/- 2 cm. When using triangular triple faces the height refers to the two lower centres of the triple faces. When using a pair of faces, the minimum distance between scoring areas of the 2 faces will be 10cm. For 60cm faces the distance will be a minimum of 2cm between the two scoring zones.
